

Yorkshire & the Humber Acute Kidney Injury Patient Care Initiative

SAVE THE DATE:

FRIDAY 17TH OCTOBER, 1330-1700 (LUNCH FROM 1230), WAKEFIELD

Acute kidney injury (AKI), previously known as acute renal failure, is a sudden loss of kidney function. AKI is strongly associated with mortality, increased lengths of stay, chronic morbidity and increased healthcare costs.

Addressing Acute Kidney Injury is a key priority for Yorkshire & the Humber. The Strategic Clinical Network is pleased to support the next collaborative regional meeting which will bring together stakeholders to continue the valuable work in this area.

An agenda and more information will follow.

To register your interest in attending, please contact:
rebecca.campbell6@nhs.net / 0113 8253448.

Dr John Stoves—Clinical Lead:
